

Gain knowledge and experience in natural resources conservation-

# Volunteer for the Earth Team

The USDA Natural Resources Conservation Service is looking for one or more outstanding students to volunteer at the Manhattan Plant Materials Center (PMC). The purpose of the Plant Materials Program is to assemble, select, improve, test, and release plant varieties for conservation uses such as reducing soil erosion or improving water and air quality.

As an Earth Team Volunteer, the student(s) will support the PMC's mission of providing vegetative solutions to conservation problems.

**Duties will include greenhouse work, seed cleaning for plantings, and assisting with plant studies.**
