**The 1982 rangeland estimate of 1,000 acres is the result of a data base error. The value should be zero, because there is no rangeland in this geographic area.

NOTE: Data may not add to totals because of rounding. The error referred to in the table is the standard error of the estimate. You can obtain the margin of error at the 95% confidence limit by multiplying the error by 1.96. Standard errors greater than 50% of the estimate indicate a low level of statistical reliability.
