The Five-Step OJT Cycle for Procedural Training (Skill)

OJT Module Lesson

Title: 1014 How to find, access, and use the Web Soil Survey web site.	
WHAT	WHY, WHEN, WHERE, HOW, SAFETY, QUALITY
Cycle step 1	Trainer should help the trainee find and access the Web Soil Survey web site on the trainee's computer [and save as favorite]. Review and agree to the objectives with the trainee.
Cycle step 2	Do the following:
1. Review the home page <ul style="list-style-type: none"> • Three Basic Steps • I want to ... • Announcements/Events • I want help with... Browse by Subject 	Trainer opens all links and files and shows what is at each. No need to read through all material at this point. Just see what is there. Trainee observes.
2. Find, open, and read through the "How to Use Web Soil Survey" under "I want help with..."	Provide trainee a few minutes to scan through the material. No need to read thoroughly as observing the next step will be a better learning method.
3. Start WSS	Trainer - "Push" the button
4. Follow "How to Use Web Soil Survey" to guide you through the web site.	Trainer performs, trainee observes. Check out all functions, options, etc. of the web site.
Cycle step 3	Switch seats. Trainee performs while trainer provides guidance as needed.
Cycle step 4	Move on to the measurement of learning next page.
Cycle step 5	Trainer provides feedback and debriefs trainee. Repeat anything as needed until trainee is able to perform without supervision.

OJT Module Lesson Measurement of Learning

Title: **1014 How to find, access, and use the Web Soil Survey web site.**

WHAT	WHY, WHEN, WHERE, HOW, SAFETY, QUALITY
<p>Customer wants soil survey information for two plots of land. They wish to purchase one of the two and want to know what the soils will tell them. They want to use it for pasture and forage, a truck garden, and building a house, barn, and greenhouse. They also want information concerning topsoil sources for use in the greenhouse. Provide them with the information they need.</p>	<p>Trainer observe while trainee performs.</p> <p>Select 2 AOIs anywhere in your survey area. Keep them small, about 200 acres each. It is the process of pulling the information together that is most important. Doing this for 2 areas provides repetition for the learner.</p> <p>Trainer could add or substitute own scenario for measuring learning.</p>

SF-182

Trainee and/or supervisor access Aglearn to verify completion of the module via its SF-182.
