

PART 512 – CONSTRUCTION

SUBPART D – QUALITY ASSURANCE PROCEDURES

WA512.34(b)(3)

WA512.32 Quality Assurance Procedures

- (b) Quality Assurance Inspection (QAI) shall be performed on all Job Class I through IV engineering practices to assure that installation is in accordance with construction drawings, specifications and NRCS standards and guidelines. The responsible line officer, in consultation with the person having the design approval authority shall determine the minimum QAI, including personnel assigned to the job necessary to install the practice.
- (c) Quality Assurance Inspection (QAI) shall be performed on all Job Class V through VII engineering practices to assure that installation is in accordance with construction drawings, specifications and NRCS standards and guidelines. The responsible line officer, in consultation with the person having the design approval authority shall determine the minimum QAI, including personnel assigned to the job necessary to install the practice.

WA512.34 Inspection of Federally Contracted Projects

(a) General

In addition to NEM 512 policy, all federally administered contracts involving engineering practice application will require adequate construction inspection to insure conformance with the requirements of the construction drawings and specifications.

(b) Construction Management Staff

- (1) All Federal or Contracting Local Organization (CLO) contracts will have an assigned NRCS Contracting Officers Technical Representative (COTR).
- (2) As determined by the COTR, Federal or Contracting Local Organization (CLO) contracts will have an assigned NRCS construction inspector.
- (3) All assignments will be made by the NRCS Area Engineering staff or the State Conservation Engineer.
