

INSTRUCTIONS FOR USE OF WASHINGTON CONSTRUCTION SPECIFICATION (CS-16)

EARTH FILL, CLASS U

1. Applicability

Construction Specification CS-16 is applicable to placement of earth fills where the compaction is not required and the fill may contain waste materials, provided it does not cause pollution and extensive void space within the fill.

It is used for earth fills within waste areas, cover for disposal areas, spoil banks, and minor embankments with maximum fill heights less than 4.0 (four) feet.

2. Material Specifications

There are no material specifications complementary to Washington State Construction Specification CS-16.

3. Special Items to be Included on the Drawings:

- a. The location, configuration, and limits of each fill area.
- b. Material other than earthfill, allowed for burial
- c. Special requirements for finish grade of fill areas.
- d. Special requirements for minimum cover of bulky waste materials, if applicable.
- e. Special requirements for control of erosion, sedimentation, water pollution, and air pollution.
- f. Specify method of measurement and payment, if applicable.
