

INSTRUCTIONS FOR USE OF WASHINGTON CONSTRUCTION SPECIFICATION (CS-60)

WELL

1. Applicability

Construction Specification CS-60 is applicable to the installation of all water wells. It covers materials and installation requirements. It does not include pumps used to elevate the water to the surface.

2. Material Specification

There are no material specifications complementary to Washington State Construction Specification CS-60. Requirements for all materials are included on the construction drawings.

3. Special Items to be Included on the Drawings

- a. Location, diameter and anticipated yield
- b. Depth, size, encasement and screening requirements
- c. Well packing and sealing
- d. Proposed size and type of pump, anticipated depth of setting, anticipated normal yield
- e. Sanitation protection requirements, if needed
- f. Specify method of measurement and payment, if applicable
