

Part 407 – Documentation & Certification

Subpart B – Documentation & Certification

NM407.10 Supporting data.

c) Data required to show quantities and that the installation meets standards and specifications are contained in Exhibit A. Exhibit A is a guideline, and additional data may be required by the practice standard and specification. The completion check will contain, as a minimum, the supporting data indicated in Exhibit A for the practice.

NM407.11 Checking completed work.

c) Completed quantities.

1) It is State policy that design quantities shall be the basis for determining the amount of construction quantities for a practice providing the following conditions are met:

(i) The design quantity of the practice is based on the actual dimensions, elevations, and volumes of the practice as staked for construction.

(ii) The completion check verifies that the practice is installed as designed.

(iii) No change orders have been approved and issued.

(iv) The installed practice meets specifications.
