Table 13b.--Sanitary Facilities (Part II)

(The information in this table indicates the dominant soil condition but does not eliminate the need for onsite investigation. The numbers in the value columns range from 0.01 to 1.00. The larger the value, the greater the limitation. See text for further explanation of ratings in this table)

Map symbol and soil name	Pct. of map unit	Trench sanitary landfill		Area sanitary landfill		Daily cover for landfill	
		Rating class and limiting features	Value	Rating class and limiting features	Value	Rating class and limiting features	Value
1: Akerite-----	85	Very limited Depth to saturated zone Too clayey	1.00 0.50	Very limited Depth to saturated zone Seepage	1.00 1.00	Somewhat limited Too clayey Depth to saturated zone	0.50 0.09
2: Akerite-----	85	Very limited Depth to saturated zone Slope Too clayey	1.00 0.63 0.50	Very limited Depth to saturated zone Seepage Slope	1.00 1.00 0.63	Somewhat limited Slope Too clayey Depth to saturated zone	0.63 0.50 0.09
3: Albee-----	45	Very limited Depth to bedrock Slope	1.00 0.04	Very limited Depth to bedrock Slope	1.00 0.04	Very limited Depth to bedrock Slope	1.00 0.04
Anatone-----	40	Very limited Depth to bedrock Large stones Too clayey Slope	1.00 1.00 0.50 0.04	Very limited Depth to bedrock Slope	1.00 0.04	Very limited Depth to bedrock Large stones Too clayey Slope	1.00 1.00 0.50 0.04
4: Albee-----	50	Very limited Depth to bedrock Slope	1.00 0.04	Very limited Depth to bedrock Slope	1.00 0.04	Very limited Depth to bedrock Slope	1.00 0.04

Table 14a.--Construction Materials (Part I)

(The information in this table indicates the dominant soil condition but does not eliminate the need for onsite investigation. The ratings given for the thickest layer are for that layer above and excluding the bottom layer. The numbers in the value columns range from 0.00 to 0.99. The greater the value, the greater the likelihood that the soil is a source of gravel, sand, and topsoil. See text for further explanation of ratings in this table)

Map symbol and soil name	Pct. of map unit	Potential as source of gravel		Potential as source of sand		Potential as source of topsoil	
		Rating class and limiting features	Value	Rating class and limiting features	Value	Rating class and limiting features	Value
1: Akerite-----	85	Poor Bottom layer not a source Thickest layer not a source due to fines or thin layer	0.00 0.00	Poor Bottom layer not a source Thickest layer not a source	0.00 0.00	Good	
2: Akerite-----	85	Poor Bottom layer not a source Thickest layer not a source due to fines or thin layer	0.00 0.00	Poor Bottom layer not a source Thickest layer not a source	0.00 0.00	Fair Slope	0.37

Harlow-----	25	Poor Bottom layer not a source Thickest layer not a source due to fines or thin layer	0.00 0.00	Poor Bottom layer not a source Thickest layer not a source	0.00 0.00	Poor Too clayey Rock fragments Depth to bedrock Slope	0.00 0.00 0.00 0.37

Table 14a.--Construction Materials (Part I)--Continued

Map symbol and soil name	Pct. of map unit	Potential as source of gravel		Potential as source of sand		Potential as source of topsoil	
		Rating class and limiting features	Value	Rating class and limiting features	Value	Rating class and limiting features	Value
359: Zumwalt-----	65	Poor Bottom layer not a source Thickest layer not a source due to fines or thin layer	0.00 0.00	Poor Bottom layer not a source Thickest layer not a source	0.00 0.00	Poor Too clayey Slope Depth to bedrock	0.00 0.96 0.97
Harlow-----	20	Poor Bottom layer not a source Thickest layer not a source due to fines or thin layer	0.00 0.00	Poor Bottom layer not a source Thickest layer not a source	0.00 0.00	Poor Too clayey Rock fragments Depth to bedrock Slope	0.00 0.00 0.00 0.96

The interpretations for gravel evaluate coarse fragments more than 0.2 inch in diameter in the bottom or thickest layer of the soil.
 The interpretations for sand evaluate the amount of sand and fine gravel in the thickest or bottom layer of the soil. Organic soil layers with a Unified engineering class for peat (PT) are also evaluated.
 The interpretations for topsoil evaluate the following soil properties at various depths: Calcium carbonates, clay content, soil bulk density, sand content, soil wetness, coarse fragments 0.2 to 3.0 inches in diameter, fragments more than 3 inches in diameter, organic matter content (OM), sodium content expressed as the sodium adsorption ratio (SAR), salinity expressed as dS/m of electrical conductivity (EC), depth to bedrock, slope, and soil pH.

Table 14b.--Construction Materials (Part II)

(The information in this table indicates the dominant soil condition but does not eliminate the need for onsite investigation. The numbers in the value columns range from 0.00 to 0.99. The smaller the value, the greater the limitation. See text for further explanation of ratings in this table)

Map symbol and soil name	Pct. of map unit	Potential as source of reclamation material		Potential as source of roadfill	
		Rating class and limiting features	Value	Rating class and limiting features	Value

Table 21.--Taxonomic Classification of the Soils

Soil name	Family or higher taxonomic class
Akerite-----	Ashy over loamy, glassy over isotic, frigid Aquic Vitrixerands
Albee-----	Fine-loamy, mixed, superactive, frigid Vitrandic Haploxerolls
Almota-----	Fine-loamy, mixed, superactive, mesic Calcic Haploxerolls
Analulu-----	Loamy-skeletal, isotic, frigid Vitrandic Haploxerepts
Anatone-----	Loamy-skeletal, mixed, superactive, frigid Lithic Haploxerolls
Balm-----	Coarse-loamy over sandy or sandy-skeletal, mixed, superactive, mesic Fluvaquentic Haploxerolls
Bittercreek-----	Coarse-loamy over sandy or sandy-skeletal, isotic over mixed, frigid Aquandic Endoaquolls
Bluecanyon-----	Loamy-skeletal, mixed, superactive, frigid Lithic Haploxerolls
Bocker-----	Loamy-skeletal, mixed, superactive, frigid Lithic Haploxerolls
Bordengulch-----	Loamy-skeletal, isotic Andic Eutrocryepts
Bridgewater-----	Loamy-skeletal, mixed, superactive, mesic Cumulic Haploxerolls
Btree-----	Ashy over clayey-skeletal, amorphic over smectitic, frigid Alfic Udivitrands
Bucketlake-----	Ashy over loamy-skeletal, amorphic over isotic Typic Vitricryands
Buford-----	Fine-loamy, mixed, superactive, frigid Vitrandic Haploxerolls
Bunchpoint-----	Coarse-loamy, isotic, frigid Vitrandic Haploxerolls
Catherine-----	Fine-silty, mixed, superactive, mesic Cumulic Endoaquolls
Chard-----	Coarse-loamy, mixed, superactive, mesic Calcic Haploxerolls
Cherrycreek-----	Loamy-skeletal, isotic, frigid Vitrandic Haploxerolls
Chesnimus-----	Fine-loamy, mixed, superactive, frigid Calcic Argixerolls
Cheval-----	Coarse-loamy over sandy or sandy-skeletal, mixed, superactive, frigid Aquic Cumulic Haploxerolls
Clearline-----	Ashy-skeletal, glassy, frigid Vitrandic Haploxerolls
Cloverland-----	Fine-silty, mixed, superactive, frigid Xeric Argialbolls
Collegecreek-----	Ashy over loamy, glassy over mixed, superactive, mesic Typic Vitrixerands
Conley-----	Fine, smectitic, mesic Xerertic Argialbolls
Copperfield-----	Loamy-skeletal, mixed, superactive, mesic Pachic Argixerolls
Cowsly-----	Fine, smectitic, frigid Xerertic Argialbolls
Crawfish-----	Loamy-skeletal, mixed, superactive, Humic Lithic Dystricroyepts
Demasters-----	Fine-loamy, mixed, superactive, frigid Pachic Ultic Argixerolls
Dixiejett-----	Loamy-skeletal, mixed, superactive, mesic Typic Argixerolls
Doublecreek-----	Coarse-loamy, mixed, superactive, mesic Pachic Haploxerolls
Downards-----	Loamy-skeletal, isotic, frigid Andic Hapludolls
Downeygulch-----	Coarse-loamy, mixed, superactive, frigid Vitrandic Haploxerepts
Eastpine-----	Loamy-skeletal, isotic, frigid Vitrandic Haploxerolls
Eggleson-----	Sandy-skeletal, mixed, frigid Oxyaquic Haploxerolls
Emily-----	Loamy-skeletal, isotic, mesic Vitrandic Haploxerolls
Endoaquents-----	Frigid Aeric Endoaquents
Endoaquepts-----	Frigid Endoaquepts
Endoaquolls, frigid-----	Frigid Endoaquolls
Endoaquolls, mesic-----	Mesic Endoaquolls
Feaginranch-----	Fine, isotic Aquandic Cryaquolls
Ferguson-----	Ashy over loamy-skeletal, amorphic over isotic, frigid Typic Udivitrands
Fivebit-----	Loamy-skeletal, mixed, superactive, frigid Lithic Ultic Haploxerolls
Flybow-----	Loamy-skeletal, mixed, superactive, nonacid, mesic Lithic Xerorthents
Flycreek-----	Ashy over clayey, amorphic over smectitic, frigid Alfic Udivitrands
Flyvalley-----	Ashy, amorphic, frigid Lithic Udivitrands
Freels-----	Coarse-loamy, mixed, superactive, frigid Cumulic Haploxerolls
Geisercreek-----	Ashy over clayey, amorphic over smectitic, frigid Alfic Udivitrands
Gelsinger-----	Fine, smectitic, mesic Calcic Pachic Argixerolls
Getaway-----	Loamy-skeletal, isotic, frigid Vitrandic Argixerolls
Gwin-----	Loamy-skeletal, mixed, superactive, mesic Lithic Argixerolls
Gwinly-----	Clayey-skeletal, smectitic, mesic Lithic Argixerolls
Hapludolls-----	Frigid Aquic Hapludolls
Harl-----	Ashy-skeletal over loamy-skeletal, amorphic over isotic, frigid Typic Udivitrands
Harlow-----	Clayey-skeletal, smectitic, frigid Lithic Argixerolls
Hershal-----	Coarse-silty over sandy or sandy-skeletal, mixed, superactive, mesic Cumulic Endoaquolls
Howmeadows-----	Fine, smectitic, frigid Vertic Epiaqualfs
Hurwal-----	Fine-silty, mixed, superactive, frigid Vitrandic Argixerolls
Imhaha-----	Loamy-skeletal, mixed, superactive, frigid Vitrandic Argixerolls
Imnaha-----	Loamy-skeletal, mixed, superactive, frigid Vitrandic Argixerolls
Josset-----	Coarse-loamy over sandy or sandy-skeletal, mixed, superactive, frigid Cumulic Haploxerolls
Kahler-----	Fine-loamy, isotic, frigid Vitrandic Haploxerolls
Kamela-----	Loamy-skeletal, isotic, frigid Vitrandic Haploxerepts
Kettenbach-----	Loamy-skeletal, mixed, superactive, mesic Pachic Argixerolls
Klicker-----	Loamy-skeletal, isotic, frigid Vitrandic Argixerolls
Klickson-----	Loamy-skeletal, isotic, frigid Vitrandic Argixerolls
Langrell-----	Loamy-skeletal, mixed, superactive, mesic Pachic Haploxerolls
Larabee-----	Loamy-skeletal, isotic, frigid Vitrandic Argixerolls

Table 21.--Taxonomic Classification of the Soils--Continued

Soil name	Family or higher taxonomic class
Laufer-----	Clayey-skeletal, smectitic, mesic Lithic Argixerolls
Lawyer-----	Loamy-skeletal, mixed, superactive, mesic Pachic Ultic Argixerolls
Lickskillet-----	Loamy-skeletal, mixed, superactive, mesic Lithic Haploxerolls
Limberjim-----	Ashy over loamy-skeletal, amorphic over isotic, frigid Alfic Udivitrands
Linecreek-----	Ashy-skeletal, glassy, frigid Vitrandic Haploxerolls
Linville-----	Fine-loamy, mixed, superactive, mesic Pachic Haploxerolls
Lookingglass-----	Fine, smectitic, mesic Xerertic Argialbolls
Lostine-----	Coarse-silty, mixed, superactive, frigid Pachic Haploxerolls
Lowerbluff-----	Ashy, mixed, frigid Lithic Vitrixerands
Mallory-----	Clayey-skeletal, smectitic, mesic Pachic Argixerolls
Matheny-----	Loamy-skeletal, mixed, superactive, mesic Calcic Pachic Argixerolls
Matterhorn-----	Sandy-skeletal, mixed, frigid Typic Calcixerolls
Melhorn-----	Fine-loamy, isotic, frigid Vitrandic Argixerolls
Minam-----	Fine-loamy, isotic, frigid Vitrandic Haploxerolls
Mippon-----	Sandy-skeletal, mixed, frigid Fluventic Haploxerolls
Mountemly-----	Ashy over loamy-skeletal, amorphic over isotic Typic Vitricryands
Needhill-----	Loamy-skeletal, mixed, superactive, frigid Vitrandic Argixerolls
Olot-----	Ashy over loamy-skeletal, glassy over isotic, frigid Typic Vitrixerands
Parsnip-----	Loamy, mixed, superactive, frigid Lithic Argixerolls
Phys-----	Loamy-skeletal, mixed, superactive, mesic Typic Argixerolls
Powwatka-----	Fine-silty, mixed, superactive, frigid Vitrandic Argixerolls
Puzzlecreek-----	Loamy-skeletal, isotic Andic Eutrocryepts
Quirk-----	Fine, smectitic, frigid Vitrandic Palexerolls
Ramo-----	Fine, smectitic, mesic Typic Argixerolls
Reavis-----	Fine-loamy, mixed, superactive, frigid Calcic Haploxerolls
Redmount-----	Coarse-loamy, mixed, superactive, frigid Pachic Haploxerolls
Rockly-----	Loamy-skeletal, mixed, superactive, mesic Lithic Haploxerolls
Rondowa-----	Loamy-skeletal, mixed, superactive, frigid Pachic Haploxerolls
Sag-----	Fine-loamy, mixed, superactive, frigid Pachic Argixerolls
Schrier-----	Fine-loamy, mixed, superactive, mesic Calcic Pachic Haploxerolls
Schuelke-----	Loamy-skeletal, mixed, superactive, mesic Calcic Argixerolls
Sherod-----	Loamy-skeletal, mixed, superactive, frigid Lithic Haploxerepts
Silverlake-----	Fine, smectitic, frigid Calcic Argixerolls
Slicklog-----	Ashy-skeletal, mixed, frigid Humic Vitrixerands
Snell-----	Clayey-skeletal, smectitic, frigid Pachic Argixerolls
Snow-----	Fine-silty, mixed, superactive, mesic Cumulic Haploxerolls
Sopher-----	Clayey-skeletal, smectitic, mesic Vitrandic Haploxeralfs
Sturgill-----	Fine-silty, mixed, superactive, frigid Fluvaquentic Endoaquolls
Sweitzberg-----	Fine, smectitic, frigid Pachic Argixerolls
Sweiting-----	Fine, smectitic, frigid Pachic Ultic Argixerolls
Syrupcreek-----	Ashy over loamy-skeletal, amorphic over isotic, frigid Alfic Udivitrands
Tamara-----	Ashy over loamy, amorphic over isotic, frigid Alfic Udivitrands
Tamarackcanyon-----	Clayey-skeletal, smectitic, frigid Vitrandic Haploxeralfs
Tannahill-----	Loamy-skeletal, mixed, superactive, mesic Calcic Argixerolls
Thiessen-----	Clayey-skeletal, smectitic, mesic Pachic Argixerolls
Thirstygulch-----	Loamy-skeletal, mixed, superactive, frigid Lithic Ultic Haploxerolls
Threebuck-----	Ashy over clayey-skeletal, glassy over smectitic, frigid Alfic Vitrixerands
Tippett-----	Fine, smectitic, frigid Vertic Palexerolls
Tolo-----	Ashy over loamy, glassy over isotic, frigid Alfic Vitrixerands
Topper-----	Fine-silty, mixed, superactive, frigid Vitrandic Haploxerolls
Troutmeadows-----	Ashy over loamy-skeletal, amorphic over isotic Typic Vitricryands
Tuckerdowns-----	Loamy-skeletal, mixed, superactive, frigid Calcic Haploxerolls
Vandamine-----	Loamy-skeletal, isotic Andic Eutrocryepts
Veazie-----	Coarse-loamy over sandy or sandy-skeletal, mixed, superactive, mesic Cumulic Haploxerolls
Voats-----	Sandy-skeletal, mixed, mesic Fluventic Haploxerolls
Volstead-----	Fine, smectitic, frigid Vitrandic Argixerolls
Wallowa-----	Fine-loamy, mixed, superactive, frigid Pachic Haploxerolls
Watama-----	Fine-loamy, mixed, superactive, mesic Pachic Haploxerolls
Wilkins-----	Fine, smectitic, frigid Xerertic Argialbolls
Wintercanyon-----	Loamy-skeletal, mixed, superactive, frigid Lithic Ultic Haploxerolls
Wolot-----	Ashy over loamy, glassy over isotic, mesic Alfic Vitrixerands
Zumwalt-----	Fine, smectitic, frigid Vertic Palexerolls

NRCS Accessibility Statement

The Natural Resources Conservation Service (NRCS) is committed to making its information accessible to all of its customers and employees. If you are experiencing accessibility issues and need assistance, please contact our Helpdesk by phone at 1-800-457-3642 or by e-mail at ServiceDesk-FTC@ftc.usda.gov. For assistance with publications that include maps, graphs, or similar forms of information, you may also wish to contact our State or local office. You can locate the correct office and phone number at <http://offices.sc.egov.usda.gov/locator/app>.
