

FLOOD DAMAGE – RESIDENTIAL PROPERTIES

This report is authorized by law (PL-83-566). While you are not required to respond, your cooperation is needed to make the results of this survey comprehensive, accurate and timely.

Watershed _____ State _____

Reach _____ Interviewer _____ Date _____

Occupant _____

Address _____ Years lived here _____

Times residence flooded: No. _____ Dates _____

Date of specific flood event _____ Hrs. of advance warning received _____

Depth of water in basement _____

Describe source of floodwater (through windows, walls, basement drains, etc.)

Depth of water on or above first floor _____

Depth of water on grounds or lawn _____

Depth of water in garage _____

Depth of water in other buildings _____

Depth of water in automobiles _____

Location of automobiles when flooded

Depth below the above flood at which damages begin _____

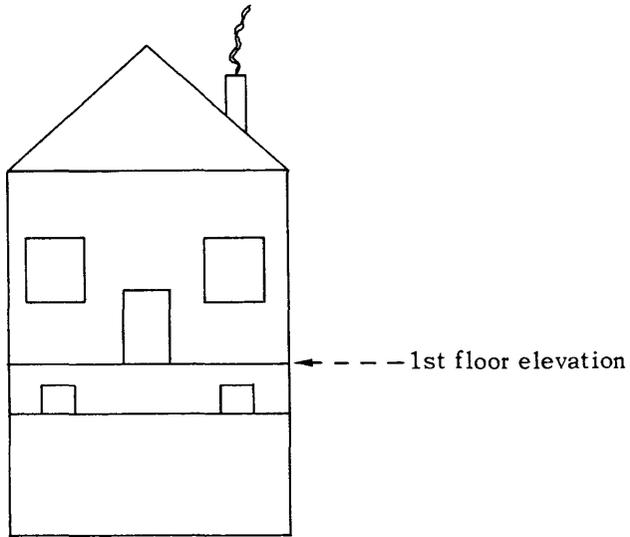

Times residence
flooded _____

- No. - Number of times this house has been flooded since you have lived in it.

Dates - Month, day, and year of all damaging floods mentioned in the previous

FLOOD DAMAGE – RESIDENTIAL PROPERTIES

Show height of experienced flood stage (depth) on the residence. Denote basement windows and depressed basement entranceways as related to first floor elevation and depth of inundation by specific flood event.

Class of Structure (check one)	Type		
	Frame	Masonry	Other (specify)
Single story, no basement			
Single story, with basement			
Two story, no basement			
Two story, with basement			
Split level			
Mobile home			
Other (specify)			

This standard drawing is intended to be used in numerous ways. Any use that can be made of this drawing that serves the enumerator's purpose should be shown. Any penciled modifications, as necessary, should be made.

Class and type
of structure
(check one)

Check the one block which most accurately describes this residence. If the "other" block under "Type" is checked, specify, by footnote, what this "other" refers to.

FLOOD DAMAGE - RESIDENTIAL PROPERTIES - APPRAISAL

Item	Specific Flood Event and Dates of Stages Above and Below							
	Specific Flood Event							
	Extent of Damage (Dollars)(Specify price base if different from flood year)							
Structure -								
House								
Outbuildings								
Driveways and walks								
Contents -								
Basement:								
Furniture								
Appliances								
Personal belongings								
First Floor:								
Furniture								
Appliances								
Personal belongings								
Lawn								
Vehicles								
Other (specify)								
Cleanup (Lawns, driveways, basement, floors, etc.)								
Subtotal - Direct Damages								
Emergency measures of evacuation, etc.								
Loss of income								
Other (specify)								
Subtotal - Indirect Damages								
Total Damages								

Size of residence _____ sq. ft.

Market value of residence (do not include lot) \$ _____

Replacement value of contents \$ _____

Remarks:

All information in the body of this table should be in terms of dollar damage estimates. Physical effects should be described in the "remarks" section of the table.

Appraisal of Flood Damages:

Specific flood event and stages above or below

- The specific flood event is the historical flood for which detailed damage estimates are to be recorded in one column of this table. Stages above and below the specific flood event refer to floodwater depths in or at this higher (above) or lower (below) than that experienced from the specific flood event. Stages above and below the specific flood event should, as a minimum, include large, medium, and small flood events. The large flood event should at least equal the 100-year flood. These damage data may be related to the first floor elevation of the house or may be obtained on a frequency-depth of inundation type basis. Use these columns to fit your method of obtaining flood damage for a range of flood frequency events.

Extent of Damage - Dollars

- Give a detailed dollar listing of damage for each identifiable item changed. When damage estimates are obtained from the person being interviewed, it is important to know what year his estimates are related to if other than year of flood.

Indirect Damages:

Emergency measures for evacuation

- Dollar value of labor, equipment, utilities, and time expended in attempting to prevent flood damages from the specific flood event.

Loss of income

- Income lost by occupant and family either to prevent flood damages or for clean-up activities, that has not been accounted for in the direct flood damage estimate above.

Other (specify)

- Name other types of indirect damage which fit under the indirect damage category for this watershed flood plain occupant, such as loss of refrigerated foods due to power failure, added medical costs due to flooding, added travel expenses caused by increased travel route, added living expenses because of flood damage to residence, etc.

Size of residence

- Give approximate living area of home in terms of square feet; e.g., 30' x 60' = 1800 sq. ft.

Market value of residence (not including lot)

- Approximate value of house and outbuildings exclusive of the value of the land area (lot) on which they are located.

Replacement value of contents

- Give the approximate cost to the dweller of replacing, with equivalent facilities, the furniture, appliances, and personal belongings normally contained in this home.
